

# Library and Book Trade Almanac 2010

Now in its 55<sup>th</sup> year

## Special Reports 2010

### **"Access to Government Information: The Presidential Transition, 2008-2009."**

Harold C. Relyea and Jeffery W. Seifert examine how the change of administrations in Washington has affected the public's ability to gain access to official information. The change, they note, "has been neither as thorough nor as rapid as anticipated by some."

### **"How Presidential NSDs Affect Access to Information."**

In a companion report, Vikki Gordon discusses the use of National Security Directives by successive presidential administrations during the past half-century to limit what the American people — and Congress — are allowed to know about major executive branch decisions.

### **"Libraries and Social Networking: Finding New Ways to Connect."**

Erin Dorney describes how libraries — from the smallest up to the Library of Congress — are finding creative ways to use social networking services such as Flickr, Twitter, and YouTube.

## **Library and Book Trade Almanac™ 2010 55th Edition** (formerly *The Bowker Annual*)

For half a century, librarians and publishers have relied on the *Library and Book Trade Almanac™* for the latest facts and insights into developments and trends within the library and book trade worlds. We have collected the essential information you always need, including the annual bestseller lists; literary award winners; salary and other cost figures; and contact information for state, regional, national, and international library associations.
