

## ADVANCE PRAISE FOR *INFORMATION AND EMOTION*

“This book tackles the important role that emotions play in our interaction with information systems. ... Until now this domain has been neglected in information behavior research, leaving a gap in our full understanding of information interaction. This book fills that gap and is essential reading for anyone who wants the full picture.”

—Carol Tenopir, Professor, School of  
Information Sciences, University of Tennessee

“A timely and valuable compilation of theory and research on the important influence of the affective domain on information behavior.”

—Carol C. Kuhlthau, Professor Emerita,  
Library and Information Science, Rutgers University

“We knew about motivation and frustration, but now the vast territory of affective responses has been charted, opening up many possibilities for future researchers. Readers will more clearly see the path to making information seekers happier and more successful.”

—Ben Shneiderman, *Designing the User Interface:  
Strategies for Effective Human–Computer Interaction*

“Nahl and Bilal’s broad-ranging collection on the affective issues associated with information behaviors has opened new research territory, and will significantly influence future information behavior research.”

—Barbara M. Wildemuth, Professor, School of Information and  
Library Science, University of North Carolina at Chapel Hill

“This excellent volume brings together the most recent research on the role of affect in the way people select, use, and process information. ... a nice balance of advanced theorizing, cutting-edge empirical research, and real-life applications. This book should be on the reading list of all researchers and practitioners interested in the fascinating role of affectivity in human thinking and behavior.”

—Joseph P. Forgas, Scientia Professor  
of Psychology, University of New South Wales
