

# Collaborators and Contributors

This collaborative undertaking would have been impossible without the instigation and cheerleading of Samantha Hastings, who wears, among other hats, that of ASIST monographs editor. John Bryans, editor-in-chief at Information Today, was also an early supporter and voice of reason and encouragement. Russ Evans, who set up the wiki for our online collaboration, provided useful guidance, especially for our first steps. Bob Williams and his students at the University of South Carolina (USC) agreed to test-drive a first draft of the book. Bob Williams, Samantha Hastings, and three valiant doctoral students at USC, Christopher Cunningham, Lisa Hudgins, and Yao Zhang, undertook copy editing, while Bob created the glossary. Most importantly, the following people helped write, edit, and occasionally gnash teeth over what has emerged as this *Introduction to Information Science and Technology*. This book would not exist but for these contributors:

Bill Albing	Terrence A. Maxwell
David Bawden	Lawrence J. McCrank
Gerald Benoit	Michel J. Menou
Jill Breznican	Michael Middleton
Pascal Calarco	T. Patrick Milas
